TRUST**

The Hillingdon Hospitals NHS Foundation Trust

One of our private car park operator clients approached us for a bespoke solution on their multi-site, The Hillingdon Hospitals NHS Foundation Trust in North West London. The Trust made significant investment in a 'pay on exit' (barrier) parking solution a few years ago. At the end of the contract the machines were no longer usable due to breakdowns and ultimately resulted in poor end-user experience for hospital visitors, patients and staff. The NHS Trust then opted to install Cale MP P&D terminals as well as deploy Pay by Phone across their car parks. These 'coin only' P&D terminals alongside network/signal issues in their car parks meant the car park users did not have the 'ease of use' as a compliant requirement on a robust & reliable P&D integrated solution.

IPS Group, UK met with the Trust and via a series of consultative discussions made notes of the issues & challenges on their existing P&D estate. IPS Group then put together a bespoke P&D solution to meet the Trust's needs & budget. Our Revolution™ MP retrofit kits have been installed as 'coin & card' enabled and with a truly roaming 4G SIM. The first batch of the MP retrofits were commissioned at the start of the new year and in the first month alone, over 86% of total P&D transactions were made via card payments (contactless including digital wallets such as ApplePay & GooglePay). The remaining retrofits have been commissioned earlier this month and we are very proud to be a part of this prestigious P&D upgrade project.

The Hillingdon Hospitals NHS Foundation Trust is very satisfied with this cost-effective, in-situ retrofit solution that IPS UK have offered. Not only this has eliminated waste (re-using existing P&D casing) but also as part of our fully integrated P&D solution, IPS Group have replaced all ageing, outdated components with the latest hardware & firmware. To add to this, our state-of-the-art back-office Data Management System enables the client to have real-time visibility on all operational & financial data at a click. Our truly intelligent & integrated P&D solution has had a positive impact on their on-site Team as they can now patrol car parks at ease whilst guiding car park users to the robust & reliable P&D terminals across their estate.

Sue Bolt, Head of Parking at The Hillingdon Hospital NHS Trust added

“Our customers were enduring a miserable experience with only being able to use cash and pay by phone. The Cale machines were becoming unreliable and the solution offered by IPS has considerably improved customer experience.”
