

Multi-Space Smart Terminal

Streamline parking with the IPS MSX™. With contactless and mobile payment options, discount coupons and multi-language support, the MSX™ enhances accessibility and convenience. The user-centric design features a vibrant full-colour display and intuitive touchscreen. Embrace the future of parking payments and elevate customer service with a solution tailored to your parking operation's evolving needs.

Key Benefits:

- **Cashless Convenience**
Customers can pay via contactless payment method. PARK SMARTER™ app/ TEXT-TO-PAY™ or SCAN-TO-PAY™ options available.
- **User-Friendly Interface**
An intuitive experience with a vibrant, high-resolution colour touchscreen display ensures easy navigation for users of all levels.
- **Unmatched Power Efficiency**
Powered by eco-friendly solar panels or mains, combined with battery backup, ensuring uninterrupted service while minimising environmental impact.

- **Future-Ready Integration**
Stay ahead of the curve with an open interface that allows seamless third-party application integration and compatibility with future innovations.
- **Real-Time Insights**
Valuable insights with real-time data enable decisions to optimise operations and enhance customer experiences based on historical trends and preferences.
- **Versatile, Modular Design**
Tailored for unattended parking environments, the modular design offers easy installation and flexible mounting

options – ideal for college campuses, leisure centres, hotels and off-street parking.

- **Enhanced Accessibility**
Lightweight and versatile, the MSX can be deployed across multiple locations, expanding accessibility and improving customer service in remote or high traffic areas.
- **Cost-Effective Solution**
Lower installation and management costs, resulting in significant savings.
